APM

METRO *seats*

The largest autoparts manufacturing group in Malaysia

METRO SEAT

SPECIFICATIONS

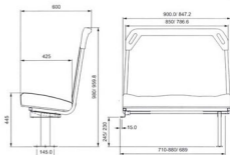

Side safety grip is incorporated in the seat design

Comfortable yet durable fabric

Strong powder coated metal framework

With the increasing expectations of safety standards for school buses and city express buses, APM has developed Metro Seats that meet all customer requirements. This unique design and craftsmanship is produced with the objective of creating an optimum comfortable seat that is pragmatic, functional yet with cost in mind. APM Metro Seats come with an option of two or three seating.

With the utilisation of modern and high technology computerised programme and hardware, APM is able to design and test every model of its automotive seats. Together with the aid of the most stringent in-house testing facilities, APM ensures its automotive seats meet the requirements of various International Certification Bodies such as E-Mark (Europe) and ADR (Australia).

It is APM's commitment to its customers to produce automotive seats of the highest in Safety, Quality and Reliability.
